PROFESSIONAL EXPERIENCE

AFGHAN PAY

KABUL, AFGHANISTAN

Full Stack & Mobile Application Developer

MAR 2026 – PRESENT

Fintech & payments company (Yousufzai Group) · React.js, Node.js, SQL, ERPNext

- Develop and maintain the Topup System (React.js, Node.js, SQL), building new features, integrating APIs, and monitoring reliability of real-time transaction processing.
- Implemented CI/CD pipelines with GitHub Actions and Docker, automating build, testing, and deployment of the Topup System and backend services.
- Build and maintain the AfghanPay and AfghanPay FTTH mobile apps — both live on the Google Play Store — and the CMS powering the FTTH platform.
- Develop, configure, and maintain the ERPNext system (Frappe framework) managing internal workflows and automation across the Yousufzai Group.

LAATULAKKI OY

REMOTE · FINLAND

Development Team Lead

2023 – SEP 2026

Finnish e-commerce company · AWS, Node.js, React, Cloudflare

Development Team Lead	2025 – 09/09/2026
Full Stack Web Developer	2024 – 2025
Frontend Developer	2023 – 2024

- Lead the company's entire development function: server infrastructure, website development, API integrations, and system architecture.
- Set up and manage the company's AWS cloud infrastructure — provisioning, deployments, monitoring, and cost optimisation.
- Led the redesign of the core system architecture and built a full-featured e-commerce platform with an admin dashboard and role-based access control.
- Integrated Cloudflare CDN to improve image storage, performance, and global delivery for international users.

SHEEN DIGITAL AGENCY
KABUL, AFGHANISTAN

Founder, CEO & Lead Developer
2025 – PRESENT

Custom software agency · Websites, platforms, ERP, CMS and mobile applications

- Lead design and development of custom software for clients: websites, platforms, ERP systems, CMS solutions, and mobile applications — delivering 10+ websites and platforms to date.
- Architect system structures, build and integrate APIs, and implement authentication and role-based user systems using a modern tech stack.
- Manage the development team to deliver scalable, reliable products on schedule with strong project management and leadership.
